Sorghum/Sudan
Sudangrass
Pearl Millet
Foxtail Millet
Sorghum--forage and grain
Corn
Teff

Others

Sunflower
Buckwheat
Plantain
Chicory

The following brassica mixtures can be used alone, or as the base for a custom "cocktail" cover crop mixture by adding seed from the list above

Cover Crop Brassica Mix

an economy mixture to be used when forage yield is of secondary importance, also an excellent choice for low fertility and low rainfall situations

3-5 lbs / acre

55% Radish--Daikon Type
18% Turnip--Purple Top
18% Winter Canola
9% Ethiopian Cabbage

Grazing Cover Crop Brassica Mix

a premium mixture of improved forage varieties to be used when maximum yield potential is desired, while still retaining the cover crop benefits. Radish and Hybrids have deep penetrating tap roots. Rapes and Cabbage have dense fibrous root systems.

3-5 lbs / acre

35% Graza Fodder Radish
24% Hunter Hybrid
24% Rangiora Rape
17% Barkant Turnip
